次の英文を読んで、問いに答えなさい。

Do you use the word “anime”? Of course you do, because it’s a Japanese word which means animated films or TV shows made by a Japanese studio. But did you know that the word is now used by many people from other countries? Anime is very popular around the world. Why are so many people attracted (①) anime? Here are some reasons.

One of the reasons anime is so popular overseas is its high quality. Anime has colorful and beautiful pictures. The facial expressions and movements of the characters are very detailed. So (②) you watch the story, you can guess how they feel or what they are thinking. The background of each scene is so realistic that many people can easily imagine the location of the story. This is because the animators are very talented.

The music used in each anime story also sounds amazing. Most anime stories have original music with a message from the stories. Some of the songs are ③(write) and performed by popular singers. So, the music itself gets popular not only among anime fans, but also among music fans. Many music fans are introduced (④) anime stories through their love of music.

⑤(____) a (____), anime music plays an important role in bringing in new fans.

Another reason anime is so popular is the wide variety of stories. Animation from outside Japan is usually made for children, and the characters are child-like. On the other hand, the stories of anime come from popular culture, world history, or science fiction. Some are even about very old Japanese stories. Thanks to the many different genres, anime attracts people of all ages ⑥because [something / they / they / like / can find].

Around the world, more and more people are becoming anime fans. Some of them learn about Japanese culture through anime. Other people even watch anime to learn ⑦(____)(____) speak Japanese. Many anime fans come to Japan because they are fascinated by the exciting world of entertainment that Japanese animation offers to everyone. Anime, born in Japan, is now one of the most successful forms of entertainment in the world.

次の英文を読んで、問いに答えなさい。

We all know that humans can't live without water. It is said that each person needs to drink at least two liters of water every day to stay healthy. Besides water for drinking, we need water every day for many other purposes such as cooking, taking a bath, and washing clothes.

We also need water to grow food. A lot of water is used for growing vegetables, rice, wheat, and so on. For example, about 2,000 liters of water is used to grow one kilogram of wheat. Farmers raising livestock need a lot of water, too. The water is used to give the livestock drinking water and to grow their feed. About 20,000 liters of water is used to produce one kilogram of beef. From this point of view, when we eat food, we are also consuming “hidden water,” the water used in the process of producing food.

Two-thirds of the Earth is water. However, 97.5% of that is seawater, and only 0.01% of the Earth's total water is water we can drink. You probably think that Japan is a country which is rich in water and doesn't have to import it from other countries. But in fact, we import a lot of “water” because we import a lot of food. Now, Japan is one of the world's largest importers of hidden water.

Why do we import so much food? The main reason is that Japanese people's eating habits are changing. We eat only half as much rice as we did sixty years ago. Instead of rice, we eat more bread and noodles. Bread and noodles are made from wheat, and about 85% of that is imported. In addition, we are also eating much more meat compared to the past. About 65% of beef is imported from countries like Australia and the United States.

To reduce the amount of hidden water imported from abroad, we need to reduce food imports. The Japanese government has already taken action. It has set a goal of raising the food self-sufficiency rate from about 40% to 45% by 2030. The government is encouraging people to choose food produced in Japan. It is also encouraging us to eat more meals made with rice and vegetables. This is because the self-sufficiency for these foods is quite high. If we take these actions, we can reduce the amount of food and hidden water we

import. It is necessary for us to remember that our everyday meals are not only related to food itself, but also to water, the limited resource we all have to share.

問1 次の(a)~(h)が、本文の内容に合っていれば○を、合っていなければ×を答えなさい。

- (a) 私たちが1日の生活に必要な水は約2リットルである。
- (b) 1キログラムの牛肉を生産するためには、約2万リットルの水が牛の飲み水として使用される。
- (c) 私たちは食べ物を食べる時、その食べ物を生産する過程で使われる水も消費していることになる。
- (d) 地球上の97.5%は水であるが、そのうち飲料水として使用できる水はごくわずかである。
- (e) 日本は水が豊かな国であるにもかかわらず、飲料水の多くを輸入している。
- (f) 日本人が以前より肉を多く食べるようになったことで、ご飯よりもパンや麺類の消費が急激に増えた。
- (g) 日本政府は、2030年までに食料自給率を45%にすることを目指している。
- (h) 日本は、小麦、米、野菜については高い食料自給率を維持している。

問2 本文の内容に合うように、(1)~(4)に入る適当な語を下のア~クから選び、記号で答えなさい。ただし、選択肢には使用しない語も含まれます。

Japan (1) on other countries for food. Actually we (2) about 60% of our food now. The main reason is that the food we eat every day has changed a lot. For example, we are eating much more food made from (3) than before. We should remember that when we import food, we also import "hidden water," the water used in the process of producing food. We should do something to (4) importing too much food and hidden water.
